

ADD A COMPELLENT EXPERT TO YOUR TEAM

Copilot Optimize goes beyond traditional offerings with regularly scheduled services delivered by a Technical Account Manager so responsive it's like having a Compellent expert on staff. When you select Copilot Optimize, your Technical Account Manager helps you improve system utilization and performance with proactive reviews, health checks and evaluations, as well as advanced configuration and software support.

Proactively Manage Your Total Storage Solution

Optimize Your Compellent Storage

Technical experts provide regularly scheduled system reviews including system logs, performance and capacity evaluations. System health and redundancy checks help to ensure high performance from your Compellent storage system.

Networked Storage Experts Extend Your IT Staff

Compellent Technical Account Managers are experts in storage solutions and work side by side with Compellent Engineering, as an extension of your team, to deliver system optimization specific to your environment.

Select Individual Services as Needed

Speed time to production and recovery by choosing onsite assistance where you need it most. Optimize software applications, plan for disaster recovery or relocate a system — all with the help of Compellent storage experts.

Make the Most of Your Storage Investment

Provide a Highly Available Solution

Copilot Optimize helps customers proactively diagnose and resolve issues, quickly and correctly. Regularly scheduled services and reviews ensure problem avoidance and help to provide increased uptime.

Reduce Administration Time

Proactive services and technical expertise allow storage administrators to spend less time on day-to-day issues, regular reporting and reviews.

Optimize Configurations

Technical recommendations gathered from extensive experience provide best practices unique to your environment to improve operations, efficiency and performance.

Proactive services to fine tune your Compellent SAN.
