

UNMATCHED STORAGE CONTROL AND SIMPLICITY

Enterprise Manager advances storage resource management by empowering you with a real-time, C-level view and reporting for your Compellent infrastructure. Make informed decisions and showcase your success as you decrease and accurately budget storage expenditures, simplify management, streamline disaster recovery and increase data center efficiency.

Simplify Multi-Site Replication

Rapid Replication Management

Easily manage multi-site replication with six-click setup for all Storage Center systems. Validate disaster recovery online and monitor storage management data on the entire replication environment, from Replay status to QoS Node Link utilization.

Balance Performance and Efficiency

Understand how utilization affects performance with features that summarize I/O usage and display ongoing CPU and memory consumption. Reduce network costs with bandwidth simulation and shaping.

Reduce Storage Costs with Robust Management

Cut Costs with Accurate Information

Leverage current and historical data to accurately manage storage purchases. View capacity utilization for all Storage Center systems, consumption by volume and disk storage allocation by tier and RAID level.

Illustrate Your Innovation

Be a hero in the boardroom with executive-ready reports that demonstrate bottom-line savings from Thin Provisioning, Continuous Snapshots, and Automated Tiered Storage.

Chargeback Consumption

Automatically generate and distribute actual storage utilization reports for departments or customers. Create a fee structure based on multiple storage tiers or customer-specific rates.

Expand IT Capabilities with Administration Savings

Unified Interface Centralizes Storage Management

Manage even complex administration and replication functions without any training required. Reduce common administrative tasks from hours to minutes.

Export Reports with Ease

Program distribution of front-office level reports on capacity, utilization, replications and events. Generate reports that easily export to common file formats.

Amp up a Green IT Strategy

Go green with ease by tapping into Compellent's economical and eco-friendly benefits with carbon and power savings data at your fingertips. Find the ideal mix of disks and save on unnecessary data center cooling and power upgrades.

"Enterprise Manager automatically calculates energy and CO2 emission savings so we can showcase our support for the college's sustainability initiative."

LARRY OWENS
System Manager
Franklin & Marshall College

"I can't understand why anyone would buy a storage solution without Enterprise Manager. If someone had the opportunity to sit down in front of it, they would buy the Compellent solution in a second."

BRIAN PRIEBE
IT Manager
BancMidwest

CREDIT UNION
OF
COLORADO

"Free Space Recovery alone is a feature that makes Enterprise Manager worth every penny. We've been able to reclaim 10%-20% of our disk space which is huge."

JARED COWART
Senior Network Administrator
Credit Union of Colorado
